

FLAT | FLIP

CONNECTOR FOR DECKING

INVISIBLE

Completely hidden. The version in aluminium with black coating guarantees an attractive result; the galvanized steel version offers good performance at low cost.

FAST INSTALLATION

Fast, easy installation thanks to the single-screw fastening and the integrated spacer-tab for precise spacing. Ideal for application with the PROFID spacer.

SYMMETRICAL GROOVING

Makes it possible to install deck planks regardless of the position of the grooving (symmetrical). Ribbed surface provides high mechanical strength.

INSTALLATION

01

Position the PROFID spacer at the joist centerline. First board: fix it with suitable screws, left visible or hidden thanks to specific accessories.

02

Insert the FLAT/FLIP fastener into the groove cut so that the spacer tab adheres to the board.

03

Position the next board by inserting it into the FLAT/FLIP fastener.

04

Using the CRAB MINI or CRAB MAXI clamp, tighten the two boards until the gap between them is 0.25 inch (see product page 424).

05

Fix the fastener to the joist underneath by using the KKTN screw.

06

Repeat the operations for the remaining boards. Last board: repeat step 01.
